

Vyntus® WALK

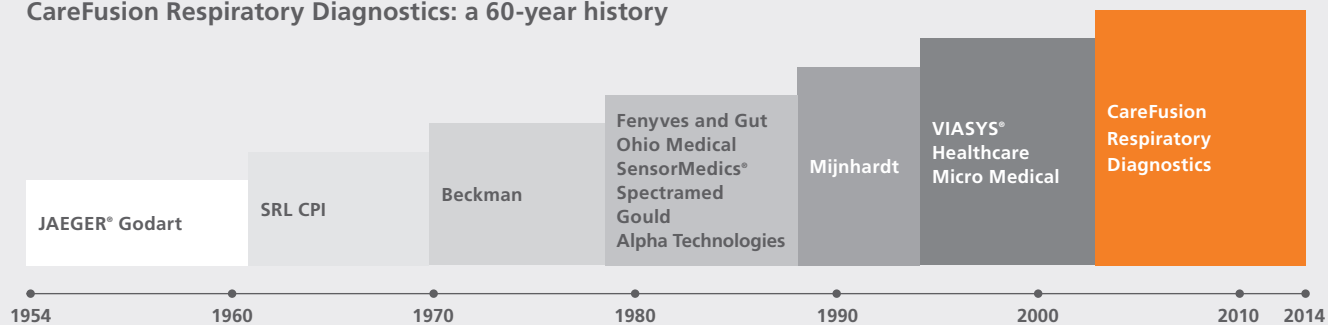

Smart diagnostics from CareFusion

Vyntus® WALK is an integrated **six-minute walk test solution** that suits the requirements of today's mobile healthcare environment.

- **Recommended** protocol by the American Thoracic Society (ATS)¹
- **Proven** diagnostic and prognostic value^{2,3}
- **Preferred** test method by patients⁴

CareFusion Respiratory Diagnostics: a 60-year history

Vyntus WALK is the complete mobile solution to comfortably assess the functional exercise capacity of your patients.

Vyntus WALK lets patients take a six-minute walk test (6MWT) wearing wireless sensors that communicate data to a tablet PC. The workflow-driven application seamlessly integrates with our SentrySuite® diagnostic platform for central data management and reporting.

Broad clinical value: generates a diagnostic and prognostic measure of functional capacity and physical fitness.

Assessment support: helps assess supplementary oxygen and fitness-to-fly.

Mobile solution: works with an 7" tablet PC and interfaces with the Nonin® WristOx2® 3150 pulse oximeter using secure Bluetooth® communication.

Complementary data: lets you manually enter blood pressure, oxygen supply, oxygen supply type and rate of perceived exertion.

Quality checks: helps check the credibility of your data.

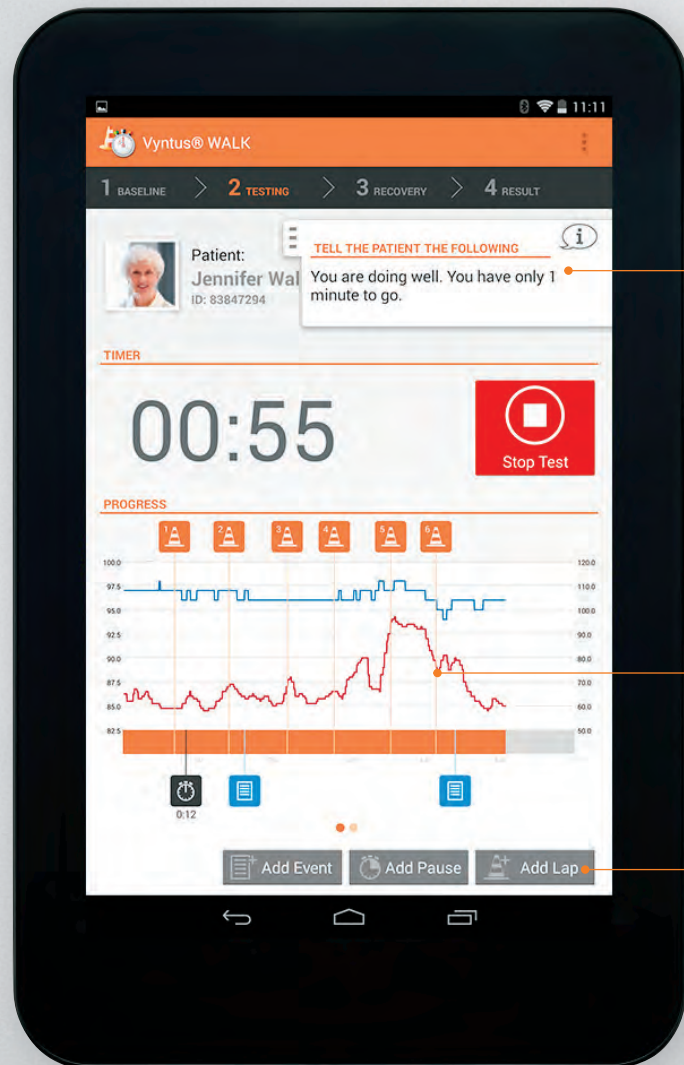

Sensor-type flexibility: can be used with soft, flex and forehead SpO₂ sensor types.

Ideal for patients in: pulmonology, cardiology, paediatrics, physical therapy, rehabilitation medicine, rheumatology, geriatrics and neurology.

Go with the flow

The intuitive Vyntus WALK tablet application smoothly moves you through the workflow. Your focus is your patient.

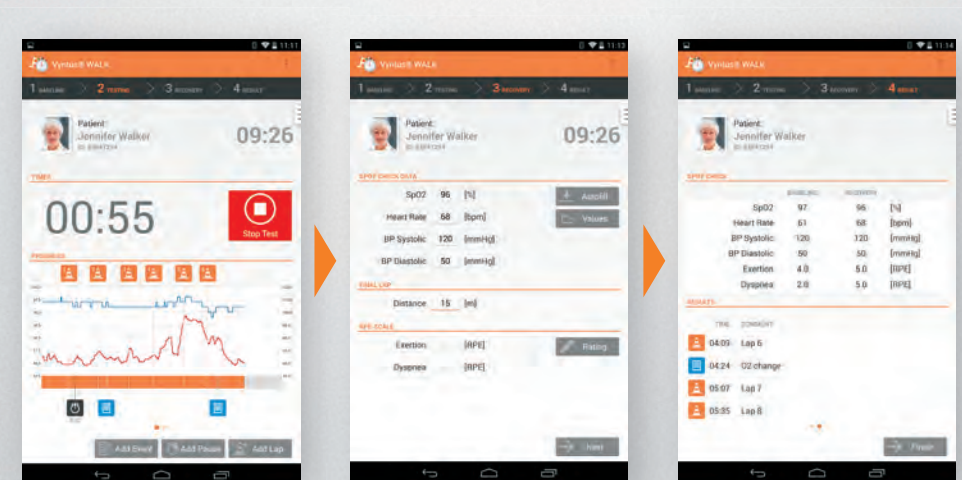

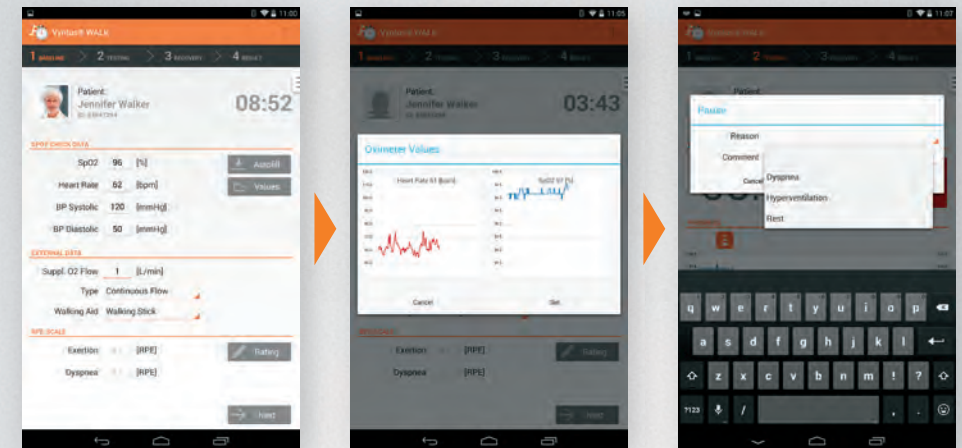

Handy pop-ups help you guide the patient

View real-time trends that display the patient's heart rate, SpO₂ and other events

Quick event buttons help you and your patient get to the next step

Smart steps

Follow your patient, acquire and track the results, then verify and report all via your wireless tablet PC.
